High Bridge School District
50 Thomas Street
High Bridge, NJ 08829

Attention: Mr. Gregory A. Hobough, Superintendent
Dear Gregory,

May 26, 2017

I would like to take this opportunity to congratulate the High Bridge Township Public Schools for taking the initiative to implement many programs and products over the past several years to become a "Green" NJ School District. By implementing these numerous programs, you and your team have improved the health and safety risks of the students, teachers, faculty and visitors, while reducing negative environmental impact. Thank you for affording ATRA Janitorial Supply Co the opportunity to be your partner in providing these important programs and the ever-important training to make them successful.

Below is a list of some of the programs, and their features and benefits, that have been implemented, and how they have helped you towards you goal of creating "Green" and Sustainable facilities:

- Daily cleaners that are Eco Logo and / or Green Seal Certified through Automatic Dispensing Systems- These products are manufactured by Enviro-Solutions, industry recognized as one of North Americas leading manufacturer of Green Products. By implementing these products and training the staff, the products that are being used on a daily basis for all of your schools are improving indoor air quality and reducing the risks to your cleaning staff and all occupants of your buildings. Theses products include glass cleaner, floor cleaners, all purpose cleaners, restroom cleaners and degreasers.

- Floor program that reduces Stripping Cycles- Not only is this a huge reduction of chemicals entering the waste stream, but also worker exposure to dangerous strippers have been greatly reduced. A tremendous amount of labor has been saved as well. All while improving the appearance of the schools to create a better teaching and learning environment. This program was implemented by utilizing top-notch floor care products manufactured by Pioneer Eclipse and rigorous training on all facets of hard floor care. By implementing this disciplined floor care program, the classrooms, hallways and other hard floors are going from being stripped annually to once every few years.

- Entrance Matting Program- In order to protect the flooring in the schools, reduce labor and effort in removing soil from the schools and improving indoor air quality, a mat replacement program has been implemented. The Waterhog mats, manufactured by Andersen Matting, are mats that have a unique "Water Dam" that allows the mat to hold up to 1 ½ gallons of water per square yard. This keeps the water and soil in the mat, rather than spreading throughout the buildings. In addition, the rubber reinforced nubs

Prevent the pile from crushing and extend the mats life and ability to continue to dry and scrape feet.

· Hand soap, Paper Towel and Toilet Tissue- Many years ago the district switched to Green Seal Certified Hand Soap, manufactured by Kimberly Clark. In addition to be certified green, this is foam soap. By utilizing foam soap, there has been a great cost savings through reduced usage per hand washing. In addition, the hand soap is fragrance and dye free, which reduces any user skin irritation. Also, the Jumbo Hard Roll Towels and the Jumbo Junior Coreless Toilet Tissue are certified green by Eco-Logo.

· Equipment- For many years, you have purchased cleaning equipment that helps meet your district environmental goals. From self-contained, touchless restroom cleaners, to High Speed Burnishers with dust control, to Automatic Orbital Floor Scrubbers. All of these pieces of equipment are designed to clean safely and effectively, reduce water and chemical usage, improve worker safety, reduce noise and improve indoor air quality.

Again, congratulation to you and your team's efforts to make High Bridge School District a safer learning and working environment, while reducing negative environmental impact. If ever ATRA can further assist in achieving your districts environmental goals, please reach out.

Regards,

Joe Crisafulli & Stephen Clawson
