## Age Range of cases is <1-103

*Age range of deaths is $\mathbf{3 1 - 1 0 2}$ years of age.
** Please note: Case counts for a municipality may show a reduction on certain days, this is due to address corrections or updates from the original case report.

The Hunterdon County Health Department is providing case count numbers by municipality and cannot release any additional personal information to protect case identity and privacy. Calls to the Department seeking information that cannot be provided takes health professionals away from their vital public health and COVID response duties.

The County Health Department performs contact tracing for each positive and probable COVID-19 case. If you have had close contact with an individual who has tested positive, you will be contacted by public health officials.

What is a "close contact?"
A close contact is defined as being within approximately 6 feet (2meters) of a COVID-19 case for a prolonged period of time (approximately 10 minutes or longer); close contact can occur while caring for, living with, visiting, or sharing a health care waiting area or room with a COVID-19 case

OR Having direct contact with infectious secretions of a COVID-19 case (for example, being coughed on).
